DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Invention I, claims 1-19 in the reply filed on 12/2/2008 is acknowledged.

Claims 20-24 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/2/2008.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Ashby EP 0809969, cited by applicant.

Ashby discloses a ligament-tensioning device for preparing for implantation of a joint implant comprising a base body (1), a first claw (2), with a distal bearing surface, (3), and a second claw (5), with a proximal bearing surface (6), wherein the second claw is displaceable parallel to the first claw, cutting jig, e.g. 27, having a U-shaped projections with slots (31), wherein the projections can be placed on mounts, e.g. 32, of the base body, a locking element and catches (see page 4, column 2, lines 6-19; not shown is the friction lock means on 24, which attaches to the distally extending portions near 31 which again are U-shaped), a first scale (11), a second scale (33), a cylindrical

guide (28), an alignment guide (see figure 4), a drill guide (60), wherein the cutting jig has a saw guide, e.g. 65, via the drill guide, wherein the drilling jig can be placed onto the mounts of the base body via the cutting jig (see page 5, column 1, line 50-column 2, line 1), and a force indicator (see page 4, column 1, lines 28-42) and the device is considered to be bilateral.

With regard to the statement of intended use and other functional statements, they do not impose any structural limitations on the claims distinguishable over Ashby, which is capable of being used as claimed if one so desires to do so. *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Furthermore, the law of anticipation does not require that the reference “teach” what the subject patent teaches, but rather it is only necessary that the claims under attack “read on” something in the reference. *Kalman v. Kimberly Clark Corp.*, 218 USPQ 781 (CCPA 1983). Furthermore, the manner in which a device is intended to be employed does not differentiate the claimed apparatus from prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Response to Arguments

Applicant's arguments filed 12/2/2008 have been fully considered but they are not persuasive. It is held that the prior art still reads on the claimed invention. Ashby discloses a device that has a blade body with opposing claws with opposing surfaces and wherein a cutting jig can be placed on the device. Though the jig may be used separately, the jig and apparatus may still be connected at the pins at be used together. The claims require that the can be placed onto the mounts. The device has the ability

Art Unit: 3775

to have a jig placed onto mounts which may further be considered a functional limitation of claimed structural requirements.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
